CHALLENGER, CANDIDATE CARLA JEAN NEAL ADVANCES TO THE NOVEMBER GENERAL ELECTION

Madera, CA and Assembly District 5 Counties -----Thank you to the voters of Assembly District 5 for your votes and your voice this 2018 Primary election season. I am grateful and excited to be your candidate and Democratic Party nominee in the General Election this November 6th, 2018. I stand for your collective best interests, and I have been listening and reading about the concerns and political opinions of ALL constituents in Assembly District 5, and I will continue to listen and respect everyone's views and their right to be heard AND RESPONDED TO, as we head toward the election on November 6th. We have only just begun to change our rural district for the better, where we address head-on the social and economic short-comings that have festered through conscious disregard over the last 3 Assembly sessions. If the voters see fit, my term of office will be one that solves our problems and gets things accomplished with efficiency and transparency. I will be touring in all nine counties of Assembly District 5, over the next few months and will be reaching out to you and hope to connect and earn your trust. My general goals are about improving people's lives in a shared and equitable economy that works for everyone.

- I will vote to protect our forests and parks in the public trust, for public enjoyment, for our posterity and to maintain our vital tourism industry.
- I will vote for universal, affordable single-payer healthcare and more regional funding for rural hospitals, doctors and nurses.
- I believe education is the vector for innovation and a strong State economy, in order to provide better wages, jobs and retirement security. Because our Constitutions call for a Democratic Republic, and based on my 25 years as an educator seeing it succeed, I stand behind high quality public education!
- I will work for clean air and clean water, a sustainable environment and watershed management.
- I will help to bridge the digital divide, work with citizens and scientists to adapt to climate change.
- I will work to protect election integrity.
- I will work alleviate poverty, lack of affordable housing and homelessness in rural California, strengthen main street businesses ability to have a fair and level field of competition with global corporations and labor-displacing automation.
- I will strive to promote tax fairness and help establish a California State Bank.

I want to know what you think needs fixing and what you don't. Please join me as we work for each other, and for the common good. Our posterity will judge us on whether we left the world a better place than how we received it. Onward--- **Respectfully, Carla Jean Neal**
